- [Live Analytics](#)
- [FDA Auditing](#)
- [Mobile Access](#)
- [Offline Access](#)
- [Technical Support](#)
- [Flexible Hosting](#)
- [Tiered Pricing](#)

### Regulatory Assessment

Some of the Regulatory Standards we work with include FDA Title 21 Code of Federal Regulations (CFR) Part 11, Mammography Quality Standards Act (MQSA), and the Office of Statewide Health Planning and Development (OSHPD). If your company is in need of training and the regulation you work with is not listed, please feel free to reach out to us, as we are continuing to expand the scope of our services.

### Custom Content Authoring

Content is encoded with SCORM or xAPI/TinCan using our content authoring tools. Encoding with these standards has many benefits:

- Gather data for analytics
- Monitor site performance
- Access content offline
- Access content on any device
- Monitor clinician progress
- Perform audits

### Learning Management System (LMS)

One of the most trusted and robust pieces of software in the marketplace. It is continuously being maintained, updated, and improved, providing you with one of the highest levels of security, site interactivity, and customization.

Our custom LMS efficiently optimizes a highly effective and user friendly learning environment, allowing you to have the results and user experience you desire.

### Learning Record Store (LRS)

The data collected from our Content Authoring tool and LMS is integrated into our LRS, enabling compliance and live tracking of site performance and individual progress.

### Analytics

A user friendly menu of visual metrics allows you live access to the data you care about most.

### Overview:

Curriculum: Easily create courses and see user progress at any time

Hosting: Enterprise level, elastic, and secure cloud storage

Support: Dedicated team, knowledgeable of both your product and training process

Compliance: Direct support of your regulatory consultant or we can provide compliance consulting
